TROPICAL CYCLONE BULLETIN NO. 20 Typhoon INDAY (MUIFA)

Issued at 5:00 PM, 12 September 2022 Valid for broadcast until the next bulletin at 11:00 PM today

TYPHOON "INDAY" ACCELERATES NORTH NORTHWESTWARD AND IS ABOUT TO EXIT THE PHILIPPINE AREA OF RESPONSIBILITY

Location of Center (4:00 PM)

The center of the eye of Typhoon INDAY was estimated based on all available data at 500 km North Northeast of Itbayat, Batanes (24.8°N, 124.0°E)

Intensity

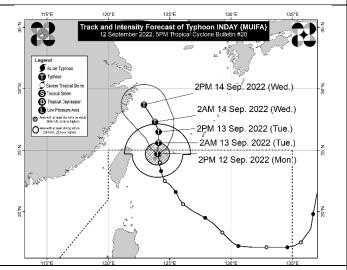

Maximum sustained winds of 140 km/h near the center, gustiness of up to 170 km/h, and central pressure of 965 hPa

Present Movement

North northwestward at 15 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to 300 km from the center

TRACK AND INTENSITY FORECAST

	Center Position			Intensity		Movement
Date and Time	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)
12-Hour Forecast 2:00 AM 13 September 2022	25.6	124.1	585 km North Northeast of Itbayat, Batanes (Outside the PAR)	140	TY	N 10
24-Hour Forecast 2:00 PM 13 September 2022	26.5	124.1	675 km North Northeast of Itbayat, Batanes (Outside the PAR)	140	TY	N 10
36-Hour Forecast 2:00 AM 14 September 2022	27.3	123.8	750 km North Northeast of Itbayat, Batanes (Outside the PAR)	140	TY	NNW 10
48-Hour Forecast 2:00 PM 14 September 2022	28.7	122.9	885 km North of Extreme Northern Luzon (Outside the PAR)	140	TY	NNW 15

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Tropical Cyclone Wind Signal is currently in effect.

TROPICAL CYCLONE BULLETIN NO. 20 Typhoon INDAY (MUIFA)

Issued at 5:00 PM, 12 September 2022 Valid for broadcast until the next bulletin at 11:00 PM today

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

Typhoon INDAY is unlikely to directly bring heavy rains in the country throughout the forecast period.

Severe Winds

- The hoisting of Tropical Cyclone Wind Signals remains unlikely throughout the forecast period.
- **Gusty conditions reaching strong to gale-force strength** may be experienced over Extreme Northern Luzon today through Wednesday due to the channeling of the typhoon circulation in the Luzon Strait.

HAZARDS AFFECTING COASTAL WATERS

- Under the influence of Typhoon INDAY, a **Gale Warning remains effect** for the seaboards of Batanes and Babuyan Islands. For more information, refer to Gale Warning #5 issued at 5:00 PM today.
- In the next 24 hours, INDAY may also bring moderate to rough seas over the eastern seaboard and the remaining
 northern seaboard of Northern Luzon (1.2 to 3.0 m). These conditions may be risky for those using small seacrafts.
 Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating
 these conditions.

TRACK AND INTENSITY OUTLOOK

- On the track forecast, Typhoon INDAY may exit the Philippine Area of Responsibility (PAR) this afternoon or tonight. Outside the PAR region, INDAY will turn more north northwestward over the East China Sea while gradually accelerating.
- INDAY is forecast to maintain its strength or may gradually weaken throughout the forecast period due to the cooler
 waters over sea east of Taiwan and East China Sea, and increasing vertical wind shear along its projected path.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 11:00 PM today.
